Mira Chami

01

Software Engineer

London, UK · +44-7495468016 · miranchami@gmail.com · mirachami.dev

Software engineer building desktop applications, game systems and applied AI tools, with ownership of React/TypeScript architecture, Rust/native integration, cross-platform delivery and automated validation.

PROFESSIONAL EXPERIENCE

Tencent

Nov 2023 - Present

Game Tech R&D Engineer · London, UK

Desktop AI Companion

React, TypeScript, Tauri, Rust

- Owned desktop companion architecture and UI in React/TypeScript, Tauri and Rust; evaluated Electron and migrated to Tauri v2.
- Built chat, companion, avatar and settings UI with shared window messaging, overlays, hotkeys, tray access, capture/paste, gRPC, Three.js and PixiJS.
- Delivered automated Windows/macOS builds and packaging, debug panels, structured logging and Steam feature flags. Resolved macOS audio-stream threading through a custom CPAL fork.

Investigative Game & Applied AI

Godot, Gemini, Node.js

- Built LLM source/evidence/witness/narrative research using Gemini/Search grounding, JSON Schemas and citation/cross-reference checks; added versioned cases and an output comparison viewer.
- Implemented character knowledge states, evidence-based questions, reply verification/revision and attributed clues. Built source-linked case-file, interview and evidence-board UI with drag-to-pin cards, navigation, transitions and keyboard/pointer controls.
- Built Node.js/Express LLM services: session restoration, caching, validation, timeouts/cancellation/retries; automated schema/data-integrity and Godot UI tests across viewports with mocked responses.

InGame Integration & Multiplayer Demo

UE5, C++, Blueprints

- Built replicated UE5 Free-for-All/team gameplay and UI: character state, scoring, interactions and match flow. Integrated InGame, Tencent's public online-service framework for game backends, covering authentication, lobbies, matchmaking, quests, inventory and achievements.
- Enabled PlayStation 5 support and local dedicated-server debugging in Unreal Editor; supported partner studios with gameplay, UI, plugin and backend integration.

Extraction Game & Applied AI

Godot, GDScript

- Built authoritative Steam P2P/LAN multiplayer and UI with listen/dedicated servers, replication, RPCs, sessions and multi-client tests. Implemented Godot co-op objectives, death/revival, map progression, currency, rewards and win/loss conditions.
- Built timeline/editor tools with typed actions, pacing previews and validation. Supplied shared events, entity context and encounter/reward/progression actions as gameplay-side foundations for an experimental AI game director.

Software Engineer · London, UK · mirachami.dev

PROFESSIONAL EXPERIENCE / CONTINUED

The Video Games Studio (VGS)

Game Programmer · Beirut, Lebanon · June 2020 - Aug 2022

- Integrated PlayFab, third-party plugins, backend services and Unity UI; built configurable difficulty, progression and shop content with ScriptableObjects.
- Supported technical interviews, onboarding/mentoring, code reviews and Jira/Trello planning; contributed game design and gameplay/software-architecture documentation.
- Developed and released a Unity mobile runner: difficulty tuning, PlayFab competitions, monetisation and a competition timing/winner-data tool.
- Owned Adventure/Drawing architecture for a published Unity puzzle game: levels, progression, persistence and saving/replaying player-created content.
- Led an adventure prototype from GDD to character, ability and interaction systems; implemented touch input and collaborated with level design.

TECHNICAL TOOLKIT

PROGRAMMING
C++ · C# · Python · TypeScript · Rust
JavaScript · GDScript · Java · C

ENGINES & DESKTOP
Unreal Engine 5 · Unity · Godot
React · Tauri · Electron (prototypes)

APPLIED AI
Gemini · LLM APIs · Search grounding
JSON Schemas · Response verification

SERVICES & NETWORKING
Node.js · Express · gRPC · InGame
PlayFab · Steamworks · Photon

UI & GRAPHICS
Three.js · PixiJS · Unity URP
Native desktop integration

ENGINEERING
Git · Perforce · Automated testing
Build & release tooling

EDUCATION

MSc Games Development (Programming) · Kingston University London · 2022 - 2023

BSc Computer Sciences · American University of Beirut · 2017 - 2021

BA Economics · American University of Beirut · 2016 - 2020

ADDITIONAL PROJECTS

Elden Ring Onboarding · Unofficial academic Unity prototype; sole programmer in a UX team. 3D map, touch controls and contextual guidance.

Sudoku Mobile · Unity prototype with three modes, progression and a completed-board validation solver.

Knockoff · Unity/Photon networked combat, lobby and match flow, with PlayFab accounts and leaderboards.

Sensation5 · Unity portals and teleportation, PC DualSense trigger feedback and room progression.

Spoken languages: English (Native) · French (Native) · Arabic (Native)

Favourite games: Clair Obscur: Expedition 33 · Celeste · Split Fiction · The Last of Us
