Mira Chami

Gameplay Programmer

London, UK · +44-7495468016 · miranchami@gmail.com · mirachami.dev

Gameplay programmer building UE5 and Unity systems, with experience in multiplayer architecture, cooperative runs, progression, online services, UI and designer tools.

PROFESSIONAL EXPERIENCE

Tencent

Nov 2023 - Present

Game Tech R&D Engineer · London, UK

InGame Integration & Multiplayer Demo

UE5, C++, Blueprints

- Built replicated UE5 C++/Blueprints gameplay and UI to validate online services through Free-for-All/team matches, covering character state, scoring, interactions and match transitions.
- Integrated InGame, Tencent's public online-service framework for game backends, across authentication, lobbies, matchmaking, quests, items, inventory and achievements; supported partner gameplay, UI, plugin and backend integration.
- Independently enabled PlayStation 5 support and local dedicated-server debugging in Unreal Editor to reproduce multiplayer issues; configured and modified CI pipelines.

Extraction Game & Applied AI

Godot, GDScript

- Designed server-authoritative Steam P2P/LAN multiplayer with listen/dedicated servers, replication, RPCs and sessions for synchronised co-op play and local multi-client testing.
- Built data-driven Godot co-op runs and UI, letting designers configure objectives, death/revival, node/map selection, currency, rewards and win/loss conditions.
- Built a timeline runtime/editor plugin so designers could author, preview and validate typed session actions. Exposed shared events, entity context and validated encounter/reward/progression actions for an experimental AI game director.

Investigative Game & Applied AI

Godot, Gemini, Node.js

- Built LLM source/evidence/witness/narrative research with Gemini/Search grounding, JSON Schemas and citation/cross-reference checks; versioned cases and a viewer supported comparison between runs. Linked knowledge-constrained dialogue and evidence-based questions to verified/revised replies and attributed clues.
- Built source-linked case-file, interview and drag-to-pin board UI with keyboard/pointer controls so players could reopen sources. Added Node.js/Express services, session restoration, caching, validation, timeouts/cancellation/retries and schema/UI tests across viewports using mocked responses.

Desktop AI Companion

React, JavaScript, Tauri, Rust

- Owned the React/Rust client and UI; evaluated Electron and migrated to Tauri v2. Implemented client-to-server AI integration, including prompt submission, HTTP/SSE response streaming, progressive reply rendering and persistent chat history. Built chat, companion, avatar and settings windows; shared window messaging, overlays, hotkeys, tray access, gRPC, Three.js and PixiJS.
- Configured and modified CI pipelines for automated Windows/macOS builds and packaging. Built diagnostic panels and structured logging for debugging; made Steam integration optional with feature flags.

PROFESSIONAL EXPERIENCE (CONTINUED)

The Video Games Studio (VGS)

June 2020 - Aug 2022

Game Programmer · Beirut, Lebanon

- Led programming for a Unity adventure prototype, translating game design specifications into character, ability and interaction systems. Implemented touch controls with the Unity Input System in collaboration with level designers.
- Designed gameplay architecture for a published Unity puzzle game, including adventure and drawing modes, level progression, persistence and saving and replaying player-created content.
- Developed and released a mobile runner in Unity, with responsibility for gameplay systems, difficulty balancing, PlayFab competitions and monetisation. Built tooling to manage competition cycles and retrieve winner data.
- Implemented configurable difficulty, progression and shop content using ScriptableObjects; integrated Unity UI, PlayFab, third-party plugins and backend services.
- Supported technical interviews, developer onboarding and mentoring, code reviews and task planning in Jira and Trello; contributed to game design documents and maintained technical documentation.

TECHNICAL TOOLKIT

ENGINES & DESKTOP
Unreal Engine 5 · Unity · Godot
React · Tauri · Electron

PROGRAMMING
C++ · C# · Python · TypeScript · Rust
JavaScript · GDScript · Java · C

SERVICES & NETWORKING
Node.js · Express · gRPC/Protobuf
InGame · PlayFab · Steamworks · Photon

UI & GRAPHICS
Three.js · PixiJS · Unity URP
Native desktop integration

APPLIED AI
Gemini · LLM APIs · Search grounding
JSON Schemas · Response verification

BUILD & ENGINEERING
Git · Perforce · CI pipelines
Automated testing · Build/release automation

EDUCATION

MSc Games Development (Programming) · Kingston University London · 2022 - 2023

BSc Computer Sciences · American University of Beirut · 2017 - 2021

BA Economics · American University of Beirut · 2016 - 2020

MISCELLANEOUS

Languages: English (Native) · French (Native) · Arabic (Native)

Favourite games: Clair Obscur: Expedition 33 · Celeste · Split Fiction · The Last of Us · Outer Wilds
