Mira Chami

UI Programmer

London, UK · +44-7495468016 · miranchami@gmail.com · mirachami.dev

UI programmer owning game and desktop interfaces, spanning investigation tools, multiplayer flows, React multi-window applications, native integration and automated testing.

PROFESSIONAL EXPERIENCE

Tencent

Nov 2023 - Present

Game Tech R&D Engineer · London, UK

Investigative Game & Applied AI

Godot, Gemini, Node.js

- Built source-linked case-file, evidence-board and interview UI with drag-to-pin cards, navigation, animated transitions and keyboard/pointer controls so players could revisit original passages.
- Connected knowledge-constrained interviews to evidence-based questions, reply verification/revision and attributed clues. Built Gemini/Search-grounded case research with JSON Schemas, citation/cross-reference checks, versioned packages and a comparison viewer to inspect generated records.
- Built Node.js/Express services with session restoration, caching, validation and timeouts/cancellation/retries; automated schema/data-integrity and Godot UI tests across viewports using mocked responses to validate flows without live model calls.

Desktop AI Companion

React, JavaScript, Tauri, Rust

- Owned React/Rust client architecture; evaluated Electron and migrated to Tauri v2. Implemented client-to-server AI integration, including prompt submission, HTTP/SSE response streaming, progressive reply rendering and persistent chat history.
- Built full-chat, lightweight companion, avatar and settings UI with shared window messaging, overlays, hotkeys and tray access; integrated gRPC, Three.js and PixiJS.
- Configured and modified CI pipelines for automated Windows/macOS builds and packaging. Built diagnostic panels and structured logging for debugging; made Steam integration optional with feature flags.

InGame Integration & Multiplayer Demo

UE5, C++, Blueprints

- Built a replicated UE5 demo to validate InGame, Tencent's public online-service framework for game backends, through Free-for-All/team matches and UI. Connected character state, scoring, interactions and match flow to authentication, lobbies, matchmaking, quests, inventory and achievements.
- Enabled PlayStation 5 support and local dedicated-server debugging in Unreal Editor to reproduce partner issues; configured and modified CI pipelines and supported gameplay, UI, plugin and backend integration.

Extraction Game & Applied AI

Godot, GDScript

- Built authoritative Steam P2P/LAN multiplayer and UI with listen/dedicated servers, replication, RPCs, sessions and multi-client tests. Made Godot co-op objectives, death/revival, map progression, currency, rewards and win/loss conditions configurable.
- Built timeline/editor tools so designers could author, preview and validate typed session actions. Exposed shared events, entity context and encounter/reward/progression actions as gameplay-side foundations for an experimental AI game director.

Mira Chami

UI Programmer · London, UK · mirachami.dev

PROFESSIONAL EXPERIENCE (CONTINUED)

The Video Games Studio (VGS)

June 2020 - Aug 2022

Game Programmer · Beirut, Lebanon

- Designed and implemented gameplay architecture for a published Unity puzzle game, integrating adventure and drawing modes with level progression, persistence and support for saving and replaying player-created content.
- Implemented user interfaces and integrated PlayFab, third-party plugins and backend services across Unity projects. Used ScriptableObjects to configure difficulty, progression and shop content.
- Led programming for a Unity adventure prototype, translating game design specifications into character, ability and interaction systems; implemented touch controls and collaborated with level designers.
- Developed and released a mobile runner in Unity, implementing gameplay, difficulty balancing, PlayFab competitions and monetisation; built tooling to manage competition cycles and retrieve winner data.
- Supported technical interviews, developer onboarding and mentoring, code reviews and task planning in Jira and Trello; contributed to game design documents and maintained technical documentation.

TECHNICAL TOOLKIT

UI & GRAPHICS
Three.js · PixiJS · Unity URP
Native desktop integration

ENGINES & DESKTOP
Unreal Engine 5 · Unity · Godot
React · Tauri · Electron

PROGRAMMING
C++ · C# · Python · TypeScript · Rust
JavaScript · GDScript · Java · C

SERVICES & NETWORKING
Node.js · Express · gRPC/Protobuf
InGame · PlayFab · Steamworks · Photon

APPLIED AI
Gemini · LLM APIs · Search grounding
JSON Schemas · Response verification

BUILD & ENGINEERING
Git · Perforce · CI pipelines
Automated testing · Build/release automation

EDUCATION

MSc Games Development (Programming) · Kingston University London · 2022 - 2023

BSc Computer Sciences · American University of Beirut · 2017 - 2021

BA Economics · American University of Beirut · 2016 - 2020

MISCELLANEOUS

Languages: English (Native) · French (Native) · Arabic (Native)

Favourite games: Clair Obscur: Expedition 33 · Celeste · Split Fiction · The Last of Us · Outer Wilds
