

- **Confidential Multiplayer SDK Demo (Unreal Engine 5)**
 - Developed an internal Unreal Engine 5 multiplayer demonstration and validation environment for Tencent’s public InGame and GVoice products.
 - Implemented multiplayer gameplay systems including character progression, game modes, pickups, scoring, and gameplay UI.
 - Extended Unreal integration-bridge and InGame SDK functionality, validating online-service features across login, matchmaking, lobbies, chat, achievements, progression, quests, and inventory while identifying and reporting integration issues.
 - Enabled PlayStation 5 support and integrated local dedicated server workflows to streamline cross-platform multiplayer testing.
 - Supported external integration teams through technical guidance, implementation documentation, scenario validation, and debugging assistance.

Tech: Unreal Engine 5, C++, Blueprints, Multiplayer Networking, Dedicated Servers, PS5, InGame SDK, GVoice, UMG.

Game Programmer | June 2020 – Aug 2022

The Video Games Studio (VGS) | Beirut, Lebanon

- Developed gameplay systems and UI features in Unity, with an emphasis on maintainable architecture and player experience.
- Integrated third-party plugins and backend services, including PlayFab, into production game projects.
- Recruited and supervised junior programmers through technical interviews, task guidance, code reviews, and implementation feedback.
- Coordinated development schedules and Agile workflows using Jira and Trello, supporting reliable delivery across the programming team.
- Contributed technical input to game design documents and maintained implementation, architecture, and project documentation.

Tech: Unity, Plastic SCM, GitHub, Trello, PlayFab, Jira.

EDUCATION

Kingston University London | 2022 – 2023

Master of Science in Games Development (Programming)

American University of Beirut (AUB) | 2017 – 2021

Bachelor of Science in Computer Science & Economics

CODING

C/C++, C#, Python, Java, Rust, TypeScript/JavaScript, GDScript, gRPC

ENGINES & FRAMEWORKS

Unreal Engine, Unity, Godot, React, Tauri

SYSTEMS

Gameplay Systems, Server-Authoritative Multiplayer, Online-Service Integration, Designer Tooling, Event-Driven Architecture, AI-facing gameplay infrastructure

PRODUCTION

Git, Perforce, Build & Release Tooling, Code Review, Technical Documentation

LANGUAGES

ENGLISH | FRENCH | ARABIC
