PROFESSIONAL EXPERIENCE

Tencent

London, UK

Game Tech R&D Engineer

Nov 2023 - Present

Built user interfaces, cross-platform desktop applications, developer tools, and AI-enabled experiences across confidential R&D projects, from prototyping through integration and delivery.

- Owned frontend and desktop architecture for an AI gaming companion using React, TypeScript, Tauri, and Rust; evaluated Electron and Tauri prototypes and migrated the application to Tauri v2.
- Designed and implemented chat, companion, avatar, and settings interfaces with shared communication across multiple windows; integrated overlays, hotkeys, tray access, and screen capture.
- Integrated avatar rendering with Three.js, companion visuals with PixiJS, and communication through gRPC; added debug panels, structured logging, and automated Windows/macOS builds and packaging.
- Built Godot interfaces for evidence boards and AI dialogue, including animated transitions, keyboard and pointer controls, session state, caching, and automated UI tests.
- Implemented asynchronous AI interactions with request validation, timeouts, cancellation, retries, and response validation; connected LLM services using Node.js and Express.
- Developed designer-facing editor tools, multiplayer and persistence systems, and online-service integrations; supported Unreal Engine 5, PC/PlayStation testing, and partner studios.

The Video Games Studio (VGS)

Beirut, Lebanon

Game Programmer

June 2020 - Aug 2022

Developed and released Unity games, including gameplay systems, UI, and backend integration, while supporting new recruits and coordinating development tasks in a startup team.

- Developed and released Unity games using C#, implementing user interfaces, gameplay systems, data-driven content, and player progression.
- Integrated PlayFab, third-party plugins, and backend services into game projects.
- Supported recruitment and onboarding through technical interviews, code reviews, and task guidance for new recruits; maintained design and technical documentation and coordinated tasks using Jira and Trello.

EDUCATION

Kingston University London 2022 - 2023

Master of Science in Games Development (Programming)

American University of Beirut (AUB)

Bachelor of Science in Computer Sciences 2017 - 2021

Bachelor of Arts in Economics 2016 - 2020

TECHNICAL SKILLS

Frontend & UI: React, TypeScript/JavaScript, Three.js, PixiJS, UI Architecture, Interaction Design

Desktop & Integration: Tauri, Rust, Electron Prototyping, Windows/macOS, gRPC/Protobuf, Node.js, Express

AI & Reliability: LLM Integration, Asynchronous Workflows, Response Validation, Automated Testing, Structured Logging

Additional Technologies: C/C++, C#, Python, Java, GDScript, Unreal Engine (C++/Blueprints), Unity, Godot, Steamworks, PlayFab

Engineering: Git, Perforce, Build & Release Tooling, Code Review, Technical Documentation, Agile Development

Languages: English (Native) · French (Native) · Arabic (Native)

Favourite games: Clair Obscur: Expedition 33 · Celeste · Split Fiction · The Last of Us
