PROFESSIONAL EXPERIENCE

Tencent

London, UK

Game Tech R&D Engineer

Nov 2023 - Present

Developed gameplay and multiplayer systems, integrated online services and generative AI, and built development tools and cross-platform applications across confidential R&D projects.

- Designed and implemented server-authoritative multiplayer architecture with dedicated and listen servers, gameplay replication, session management, and multi-client testing.
- Built player progression and persistence systems, including profiles, inventory, in-game economy, and loadouts.
- Developed reusable gameplay systems, user interfaces, and Godot editor tools for designers to configure and test gameplay events.
- Owned technical evaluation and architecture for a cross-platform AI companion using Tauri, Rust, React, and TypeScript, including desktop integration and automated Windows/macOS builds and packaging.
- Integrated online-service SDKs into Unreal Engine 5, including authentication, matchmaking, lobbies, achievements, and inventory; supported PC/PlayStation testing and partner integration.
- Prototyped and evaluated generative AI features for content generation and interactive character dialogue, including model integration, response validation, and automated testing.

The Video Games Studio (VGS)

Beirut, Lebanon

Game Programmer

June 2020 - Aug 2022

Developed and released Unity games, including gameplay systems, UI, and backend integration, while supporting new recruits and coordinating development tasks in a startup team.

- Implemented gameplay systems and user interfaces in Unity using C#, supporting game prototyping and release.
- Integrated PlayFab, third-party plugins, and backend services into game projects.
- Supported recruitment and onboarding through technical interviews, code reviews, and task guidance for new recruits.
- Helped plan and track development tasks using Jira and Trello within Agile workflows.
- Contributed to game design documents and maintained technical documentation for game systems and software architecture.

EDUCATION

Kingston University London 2022 - 2023

Master of Science in Games Development (Programming)

American University of Beirut (AUB) 2017 - 2021

Bachelor of Science in Computer Science & Economics

TECHNICAL SKILLS

Coding: C/C++, C#, Python, Java, Rust, TypeScript/JavaScript, GDScript

Engines & Frameworks: Unreal Engine, Unity, Godot, React, Tauri, Three.js, PixiJS

Systems: Gameplay Systems, Server-Authoritative Multiplayer, Online-Service Integration, Designer Tooling, Event-Driven Architecture, Generative AI Integration

Platform & Services: Steamworks, PlayFab, gRPC, Desktop Integration, Build & Release Tooling

Production: Git, Perforce, Code Review, Technical Documentation, Agile Development

Languages: English (Native) · French (Native) · Arabic (Native)

Favourite games: Clair Obscur: Expedition 33 · Celeste · Split Fiction · The Last of Us
