Mira Chami

UI Programmer

London, UK · +44 7495 468016 · miranchami@gmail.com · mirachami.dev

UI programmer building game and desktop interfaces where the interaction is the experience: evidence boards, multiplayer flows and streaming AI chat, across Godot, Unreal Engine 5, Unity and React.

PROFESSIONAL EXPERIENCE

Tencent

Nov 2023 – Present

Game Tech R&D Engineer (UI & Gameplay) · London, UK

Investigative Game & Applied AI

Godot, Gemini, Node.js

- Owned UI for an investigation game: case files, an evidence board and phone interviews, connected through shared investigation state.
- Built a tactile evidence board: players select text from files or transcripts, drag it to pin as cards, draw connections and marker annotations, and reopen the original passage from any card.
- Handled keyboard, mouse and trackpad input with animated transitions, expandable card readers and compact previews; designed the question-building flow (pick up to three cards and an intent, review the exact question before sending).
- Wrote Godot UI tests for board state, text-selection gestures, navigation and question composition across viewport sizes, using mocked AI responses; built the supporting Node.js services and Gemini-grounded case data.

Desktop AI Companion

React, Rust, Tauri

- Designed the dual-mode UX and multi-window architecture: full chat, lightweight in-game companion, avatar and settings windows, kept in sync with shared messaging.
- Built streaming chat UI that renders replies as they arrive, with persistent history, transparent overlays, global hotkeys, tray access and avatar visuals in Three.js and PixiJS.
- Led the Electron vs Tauri evaluation and migration to Tauri v2; built diagnostic panels and automated Windows/macOS builds.

InGame Integration & Multiplayer Demo

UE5, C++, Blueprints

- Owned UI for a UE5 multiplayer demo integrating InGame, Tencent’s public online services framework. Connected menus and HUD to gameplay state, authentication, lobbies, matchmaking, progression, inventory and achievements.
- Built replicated multiplayer match flows, implemented PlayStation 5 support and supported partner studios with UI, gameplay and plugin integration.

Extraction Game & Applied AI

Godot, GDScript

- Owned game UI for a co-op multiplayer prototype, presenting synchronised player and run state (objectives, death and revival, map progression, rewards).
- Built server-authoritative multiplayer, data-driven runs and a Godot editor plugin for designers to author, preview and validate timeline actions, including enemy spawning and item rewards.

PROFESSIONAL EXPERIENCE (CONTINUED)

The Video Games Studio (VGS)

Jun 2020 – Aug 2022

Game Programmer · Beirut, Lebanon

- Built UI and touch controls across Unity mobile games, including a drawing mode where players create, save and replay their own pixel-art levels.
- Owned gameplay architecture for a published puzzle game, with two modes sharing progression, saves and menus.
- Built data-driven shop and progression screens with ScriptableObjects, connecting Unity UI to PlayFab backend data.
- Led programming for a Unity adventure prototype, implementing touch input with the Unity Input System alongside level designers; shipped a mobile runner with PlayFab competitions.
- Mentored developers, ran code reviews, supported technical interviews and maintained technical documentation.

TECHNICAL TOOLKIT

Game UI & Engines:
Unreal Engine 5 · Unity UI (uGUI) · Godot · Blueprints · Unity Input System · Input Handling

Web & Desktop:
React · TypeScript · JavaScript · Tauri · Rust · Electron · Multi-Window UI

Graphics & Native APIs:
Three.js · PixiJS · Unity URP · Native API Integration · UI Animation

Languages:
C++ · C# · GDScript · Python · Java · C

Testing & Build:
UI Test Automation · Responsive UI Testing · Automated Testing · Debugging · CI · Build & Release Automation · Performance Profiling · Git · Perforce

Backend & Networking:
Node.js · Express · gRPC · Protobuf · InGame · PlayFab · Steamworks · Photon PUN 2

Applied AI:
LLM Integration · Google Search Grounding · Structured Outputs (JSON Schema) · LLM Output Validation

EDUCATION

MSc Games Development (Programming) · Kingston University London · 2022 – 2023

BSc Computer Science · American University of Beirut · 2017 – 2021

BA Economics · American University of Beirut · 2016 – 2020

MISCELLANEOUS

Languages: English, French, Arabic (all native)

Favourite games: Clair Obscur: Expedition 33 · Celeste · Split Fiction · The Last of Us · Outer Wilds
